Subject: settle this

i believe a setrtlement is needce immediatelly as this has dragged on too long. there are more important things to take care of and were it not for microsoft tghere probably be near the advances i hi-tech that we have today. i have never heard one complaint about the prices that windowsx wa too expensive. i don't se where the 9 states says that it is. if it wasw too expensive nobody woul but it. compare it to linux- who wants it. pedamner@aol.com
